## DISHWASHER DOOR INSTALLATION

---

Install your dishwasher door in 7 simple steps.

1. Remove the laser film from dishwasher door.
2. Line the dishwasher handle up with the 2 pre-drilled holes.
3. Use the screws that come with the dishwasher handle to attach to the panel.
4. The head of each screw should recess into the wood upon tightening.
5. Line up the pre-drilled holes on the door with the 6 open screw slots on the dishwasher.
6. Attach with the 6 screws provided with the dishwasher.
7. Screw in and tighten all 6 screws on the door panel.
8. Once all 6 screws are in place, go back and hand tighten to make sure that the door is flush against the dishwasher.
